

A

ADENA, OHIO

1960 1209 ADENA, OHIO Model K 1966 0824 ADENA, OHIO 43901 Model K
 The Model K was a handpowered machine. Note the close gap between the round postmark (dial), and the wavy-line killer (cancellation).

ADENA	Model K		DT	200	1949 0125	1965 0520
ADENA	Model K	43901	DTSz	200	1965 1207	1984 0324

AKRON, OHIO

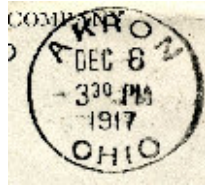

With no numbers in dial or cancel

(single digit number in table next to dial or cancel represent differences in metal dies)

AKRON		BT	1	200	1	1916 0406	1916 0615
AKRON		BT	1	2012		1916 0729	1916 0803
AKRON		BT	2	2012		1916 1109	1917 0531
AKRON		BT	2	200	1	1917 0813	1919 0616
AKRON		BT		200	3	1945 0621	1947 0424
AKRON		DT		200	3	1961 0603	1966 0422
AKRON	443----	Rz		200	3	1976 0920	1987 0701

Below:

Intermittent use of **Die 1** dial after 1916 0615

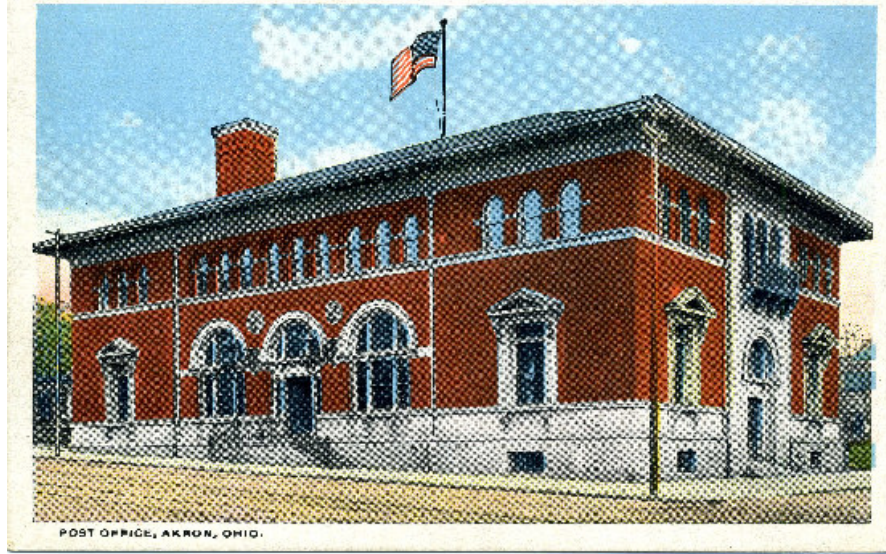

1917 1208 use.

Compare the "A" of AKRON in Die 1 and 2. On the example above, the enclosed area at the top of the "A" is small. On the example at right, the area is large.

Above: Akron Universal Type BT (Dial **Die 2**) 2012 used 1917 0531. Bob Payne's research tracks the use of Dial 1 from cancellation type 200 to 2012. But as shown in the inserted box, Dial Die 1 was used intermittently thereafter. The study of die changes is challenging if examples are not plentiful.

2008 Machine Cancel Symposium: OHIO UNIVERSAL CANCELS

With numbers or letters in dial (indicated as being on the left – L – or right – R – inside the dial)

Die differences are indicated with a number that follows the assigned catalog type.
